

Subject: Artificial Intelligence

Class: TYCS

Total Marks: 75

Q1) Attempt any four questions [Total-marks: 20]

A) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

B) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

C) dsfghfghkjlk;fdgfhgkjlk

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

D) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

E) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

F) xvbxyzbcxbxcxcnsbfsb

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and

correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

Q2) Attempt any four questions [Total-marks: 20]

A) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

B) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

C) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

#### D) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

#### E) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

F) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

Q3) Attempt any four questions [Total-marks: 20]

A) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

B) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers

from the answers array and includes them in the PDF.

### C) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

### D) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The `generatePDF()` function now collects all answers from the answers array and includes them in the PDF.

### E) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The `autoSaveAnswer()` function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

F) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

Q4) Attempt any five questions [Total-marks: 15]

A) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

B) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions

(Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

C) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

D) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

E) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.

F) Write a note on Unsupervised Learning

Answer: Auto-save for all questions: The autoSaveAnswer() function now loops through all textareas in the current question group and correctly stores their values in the answers array.

Navigation Handling: Before navigating between groups of questions (Next/Previous buttons or directly via the question navigation), the answers are auto-saved.

PDF Generation: The generatePDF() function now collects all answers from the answers array and includes them in the PDF.
